

STOCKTAKE DUE?

FIRST THOUGHT

TRADITIONAL

SOLUTION

INTELLIGENT SOLUTION

¹²³CountIT

Nobody likes stocktakes right!!

Hours and hours of counting, messy count sheets, incorrect tallies, transcription errors. Stress!!

The ¹²³CountIT stocktake system takes away most of this stress by simplifying the mundane task of stocktaking.

Just follow these simple steps

Before stocktake

- **Print & apply barcoded labels**

At stocktake

- **Scan the barcoded products**
- **Generate a Variance Report**
- **Reconcile any errors in the count**
- **Export the completed stock count**

After stocktake

- **Upload the results into your accounting System**

Done! Minimal fuss. Minimal pain

The **CountIT¹²³** package contains everything required to enable quick, accurate and efficient stocktakes.

Rongta RP400
Thermal Transfer printer

The Rongta RP400 is recognized as one of the leading brands of thermal label printers worldwide. This printer is simple to use, compact and has many features only found in more expensive printers.

Cipherlab 8200 mobile PC
& Data/charging cradle

The Cipherlab 8200 mobile PC is ideal for this application. These scanners can scan most 1D barcodes, are easily customizable and robust enough for any application.

CountIT Stocktake
Management Software

CountIT¹²³ has been custom written by our software engineers with the sole intent of dramatically reducing the time required in performing a stocktake as well as automating the processes of gathering and processing data.

Consumables package

The consumables package consists of thermal transfer labels plus a roll of thermal transfer ribbon. Thermal transfer ensures that the print will remain clear and sharp for many years. Additional consumable packs are available on request.
