

Generalscan GS M500BT series is a new generation of 2D pocket barcode scanner. It provides intuitive scanning of the barcodes found in real-world environments – even for poor quality and damaged barcodes.

M500BT-DPM version is specially designed for decoding the Direct Part Marking barcode.

With GS M500BT Bluetooth companion scanner, you do not need to buy the expensive and heavy PDA anymore! It has dual field optics, both high density and wide field in the same unit. Build in high volume Li-ion battery, holds up to 13 hours scan with 5 seconds interval trigger. Build-in memory and large off-line storage.

It enables real-time barcode scanning into your smartphone via Bluetooth such like iPhone, iPad and all kinds of Android devices.

It increased the productivity at the retail Point of Sale (POS), in the warehouse, on the production line in a light industrial manufacturing plant, at event registration, hotel check-in and more.
